

Future Features Roadmap

Here's how we'll add your ideas to our long-term roadmap.

1. Notifications and Reminders

- **Purpose:** To proactively re-engage users and help them stay on top of their meal planning.
- **Possible Use Cases:**
 - **Ingredient Reminders:** "Did you know those carrots are about to expire? Tap here to find a recipe!"
 - **Dinner Time Prompts:** "What's for dinner? Tap the 'Magic Meal' button to find out!"

2. AI Chatbot Integration

- **Purpose:** To offer a more conversational and personalized way to discover recipes.
- **Possible Use Cases:**
 - **Ingredient Inquiry:** "I have chicken and broccoli. What can I make?"
 - **Dietary Guidance:** "Can you suggest a healthy, low-carb recipe for me?"

3. "Add New Recipe" Button

- **Purpose:** To empower the user community and grow our recipe database.
- **Possible Use Cases:**
 - **User Contributions:** Allow users to upload their favorite personal recipes, a feature that would greatly appeal to a persona like Maya, **The Health-Conscious Cook**.
 - **Community Building:** Create a sense of ownership and community among our users.

These are fantastic ideas that will be invaluable for future versions of **PlateFlow**. By setting them aside for now, we ensure we stay laser-focused on perfecting the core features for our MVP.
